

## QTANIUM 100

### Track and monitor your non-powered equipment and trailers

#### Product overview

The Qtanium 100 is a self powered asset tracker designed for non-powered assets and trailers. The Qtanium 100 is compatible with Teletrac Navman DIRECTOR and provides simple, reliable management of a variety of assets including trailers, containers, construction & mining equipment. It can be used on- or off-highway and is suitable for applications where no power is available and the asset may be unattended for long periods.

#### Partners

Teletrac Navman partners with other world leading technology providers to bring you the best solution for your business. We have a long-standing partnership with Google, and are a Microsoft and Iridium Partner, which means you can trust your business with our product.
